Bob – did you ever get the databases in the zipped folders?

Just got back in town. Let me know if I should resend or repost to your ftp below.

Becky,

I never received any emails from you either immediately before or after you sent this email????

Just sent 5 MB of zipped files. If the email doesn't make it, let me know and I can try to send individually.

Becky,

I downloaded the files but was unable to unzip the zipped files, with or without the "x". If they are that small, could you just email them to me? The pdf files came through fine.

Hey –just read all the instructions. Here are the file names:
PebbleWaterQualityDatabase_Stratus_v01_Access.zipx
PebbleWaterQualityDatabase_Stratus_v01_Excel.zipx
Technical memo_PebbleWaterQualityDatabase_12July2011.pdf
TNC_Water_Quality_Report_July2011.pdf
TNC_WQ_Report_Appendices_July2011.zipx

I put them all in a folder called TNC Data, which I copied and pasted to the er folder.

Becky,

Try this site:

Using Internet Explorer:

1. Go to: **Non-Responsive**
2. Once there, click on the directory for "er".
3. From there, you should be able to drag and drop your file.
4. Once you have transferred your file, send me an email with the file name. the files will only reside there for 5 days before getting deleted.

The way the site is set up, you blindly transfer your files. By that, I mean that once you transfer them, you will not be able to see them on any sort of list. You will just have to assume that you have been successful. Also, please let me know what the file names are.

Thanks,
Bob

Do you have an ftp site? I do not. I'm not sure if the quickr site would work, but I can't figure out what I set my password as so I'm not currently able to access it. Other option is to burn a DVD and send. Let me know what will work for you.

I don't know if a 90 Mb attachment would get through. 5 Mb would. Can they get dumped on an ftp site somewhere where I can download them?

Hey Bob – I forwarded all of Dave's emails as soon as I got them. You didn't get those? One was 5 MB and one was 90 MB. Can I send them to another email address that has storage capacity?

Hi Becky,

I can't seem to find the files or the emails. Can I get them again? I have been at or near my mailbox storage limit, so I have developed some bad habits recently regarding curating email attachments.

Thanks,

Bob

Hey Bob,

It looks like you might already have this dataset. Let me know if it didn't make it through and I can resend when I get it from Dave.

Hi Becky,

I sent a copy of the water quality report and database to Phil North and Cc'd Bob Seal on July 18th, so he should already have it. Just in case, I'll send a copy of that correspondence to you for your records. It comes in 2 emails ~ 5 Mb each.

Best,

Dave

PS. I'm definitely looking forward to seeing the results of the macroinvert/diatom work. We'll hopefully be moving the "integrated database" discussions forward over the next couple of weeks.

Also, I'm happy to review any draft material you have, just to give me a sense of what it will contain, and perhaps any helpful review I can provide from the TNC end. Do you have even a rough idea what your schedule is on that?

Subject: Bristol Bay Water Quality Database

Hi Dave,

I am working on EPA's Bristol Bay Watershed Assessment with Dan Rinella and one of the geologists working on the mining scenarios was interested in obtaining better baseline water quality data for the region. His name is Bob Seal and he works for USGS in Virginia. Anyways, I think he is using it to help determine potential chemical interactions with some of the waste rock.

Would it be possible to share the data that TNC had collected? I'm not sure, but maybe Dan and Dan have already obtained this database from you. But, they are out and I am only around this week, so I was wondering if I could get a copy for Bob?

Please let me know or give a ring if you have questions.

Thanks, Becky

p.s. I just returned from the field and will be headed back out again soon, but I have made progress analyzing the macroinvertebrate and diatom data that Dan and Dan collected for Bristol Bay. I hope to wrap it up soon so Dan and Dan can review.
